Personal Summery

Creative and detail-oriented Front-End Web Developer with 5+ years of experience building responsive, user-centric websites and web applications. I have successfully developed 30+ real-life, client-based projects designed to meet ThemeForest-quality standards using HTML, CSS, JavaScript, Tailwind CSS, Bootstrap, and various third-party plugins.

Although I have over 5 years of experience, I had to step away from full-time work for personal family reasons, which required my full attention. That phase is now over, and I'm ready to return to the field with full energy and focus.

I'm eager to rejoin a strong, creative team where I can contribute, relearn, and grow alongside others. For me, this is not just a job, it's a new beginning. I'm currently updating my skill set with modern tools like React and advanced JavaScript to align with today's development standards.

I believe age is just a number what truly matters is passion, mindset, and dedication. I'm excited to embrace this new chapter with full commitment and creativity. Thank you.

Professional Experience

Softnio IT, Front End Web Developer
March 2019 to March 2021
House - 165, Road no - 3, Mohakhali DOHS, Dhaka, Bangladesh
Speciality: Completed 6 big giant website(Front End), Most successful project of my entire life was done in here which was "ICO Crypto Landing page with HTML". Link is given below.
